Add Mixed Numbers With Like Denominators (H)

Add the whole numbers. Add the fractions.

How many one wholes are there in the fraction?

Rename the answer.

$$1\frac{2}{6} + 3\frac{5}{6} = 4\frac{7}{6} = 5\frac{1}{6}$$

$6\frac{4}{5} + 1\frac{4}{5} =$

$4\frac{5}{9} + 7\frac{8}{9} =$

$6\frac{2}{3} + 5\frac{1}{3} =$

$3\frac{3}{5} + 5\frac{2}{5} =$

$4\frac{11}{12} + 2\frac{8}{12} =$

$8\frac{3}{12} + 6\frac{10}{12} =$

$2\frac{2}{7} + 5\frac{5}{7} =$

$6\frac{4}{5} + 8\frac{1}{5} =$

$6\frac{4}{11} + 9\frac{7}{11} =$

$8\frac{6}{7} + 3\frac{3}{7} =$

$6\frac{3}{5} + 2\frac{3}{5} =$

$3\frac{8}{10} + 3\frac{9}{10} =$

$2\frac{2}{11} + 9\frac{10}{11} =$

$7\frac{4}{6} + 9\frac{3}{6} =$
