

Linear Equation from Two Points (A)

Plot a line through the two points then determine the equation for the line.

1.

A(-6,-6)

B(6,-4)

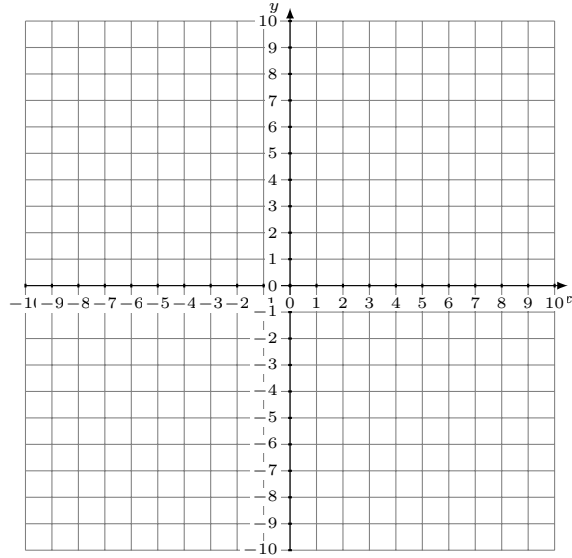

Equation: $y =$

2.

A(-3,-1)

B(-1,3)

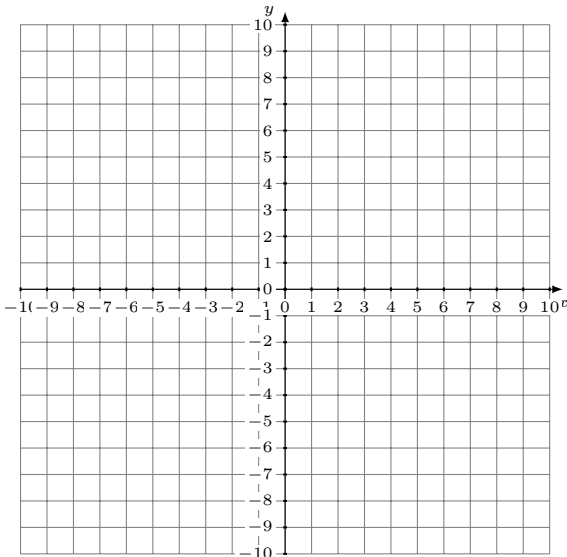

Equation: $y =$

3.

A(4,8)

B(-4,4)

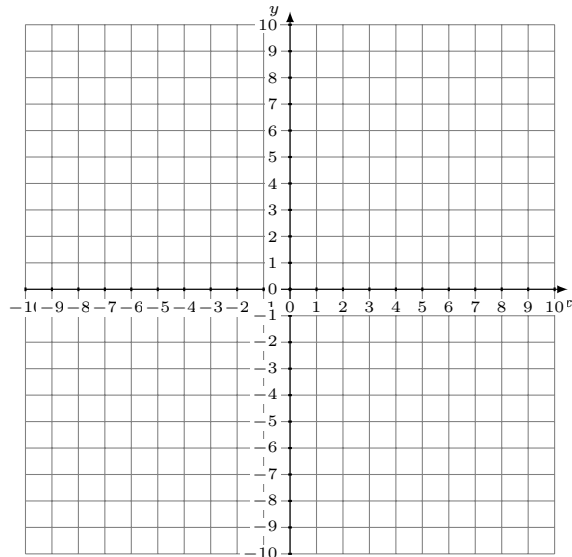

Equation: $y =$

4.

A(-8,6)

B(2,-9)

Equation: $y =$
