

## Adding Two Proper Fractions (J)

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Score: \_\_\_\_\_

Calculate each sum.

1.  $\frac{1}{7} + \frac{15}{18} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

2.  $\frac{1}{2} + \frac{4}{17} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

3.  $\frac{2}{7} + \frac{9}{13} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

4.  $\frac{2}{5} + \frac{2}{4} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

5.  $\frac{1}{2} + \frac{8}{17} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

6.  $\frac{1}{6} + \frac{5}{19} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

7.  $\frac{3}{4} + \frac{2}{15} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

8.  $\frac{3}{4} + \frac{2}{17} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

9.  $\frac{4}{7} + \frac{3}{11} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

10.  $\frac{5}{6} + \frac{3}{19} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

## Adding Two Proper Fractions (J) Answers

Calculate each sum.

$$1. \quad \frac{1}{7} + \frac{15}{18} = \frac{18}{126} + \frac{105}{126} = \frac{123}{126} = \frac{41}{42}$$

$$2. \quad \frac{1}{2} + \frac{4}{17} = \frac{17}{34} + \frac{8}{34} = \frac{25}{34}$$

$$3. \quad \frac{2}{7} + \frac{9}{13} = \frac{26}{91} + \frac{63}{91} = \frac{89}{91}$$

$$4. \quad \frac{2}{5} + \frac{2}{4} = \frac{8}{20} + \frac{10}{20} = \frac{18}{20} = \frac{9}{10}$$

$$5. \quad \frac{1}{2} + \frac{8}{17} = \frac{17}{34} + \frac{16}{34} = \frac{33}{34}$$

$$6. \quad \frac{1}{6} + \frac{5}{19} = \frac{19}{114} + \frac{30}{114} = \frac{49}{114}$$

$$7. \quad \frac{3}{4} + \frac{2}{15} = \frac{45}{60} + \frac{8}{60} = \frac{53}{60}$$

$$8. \quad \frac{3}{4} + \frac{2}{17} = \frac{51}{68} + \frac{8}{68} = \frac{59}{68}$$

$$9. \quad \frac{4}{7} + \frac{3}{11} = \frac{44}{77} + \frac{21}{77} = \frac{65}{77}$$

$$10. \quad \frac{5}{6} + \frac{3}{19} = \frac{95}{114} + \frac{18}{114} = \frac{113}{114}$$
