

Dividing Fractions (A)

Name: _____

Date: _____

Score: _____

Calculate each quotient.

$$1. \quad \frac{2}{3} \div \frac{5}{6} = \text{---} \times \text{---} = \text{---} = \text{---}$$

Inversion Result Simplify

$$2. \quad \frac{1}{4} \div \frac{1}{2} = \text{---} \times \text{---} = \text{---} = \text{---}$$

$$3. \quad \frac{1}{4} \div \frac{4}{5} = \text{---} \times \text{---} = \text{---}$$

$$4. \quad \frac{1}{3} \div \frac{2}{5} = \text{---} \times \text{---} = \text{---}$$

$$5. \quad \frac{2}{3} \div \frac{7}{9} = \text{---} \times \text{---} = \text{---} = \text{---}$$

$$6. \quad \frac{2}{9} \div \frac{1}{2} = \text{---} \times \text{---} = \text{---}$$

$$7. \quad \frac{2}{3} \div \frac{3}{4} = \text{---} \times \text{---} = \text{---}$$

$$8. \quad \frac{1}{5} \div \frac{1}{2} = \text{---} \times \text{---} = \text{---}$$

$$9. \quad \frac{2}{7} \div \frac{1}{2} = \text{---} \times \text{---} = \text{---}$$

$$10. \quad \frac{1}{9} \div \frac{1}{7} = \text{---} \times \text{---} = \text{---}$$
