

Commutative Law of Addition (I)

Name: _____

Date: _____

Write each expression in a different way using the Commutative Law of Addition.

Example: $4 + 5 = 5 + 4$

1. $2 + 5 =$

2. $11 + 1 =$

3. $17 + 5 =$

4. $30 + \frac{1}{6} =$

5. $24 + 38 =$

6. $\frac{5}{6} + 18 =$

7. $6.3 + 14 =$

8. $2 + \frac{1}{2} =$

9. $188 + 9 =$

10. $338 + 112 =$

11. $83 + 291 =$

12. $261 + 432 =$

13. $239 + 575 =$

14. $297 + 607 =$

15. $42 + 476 =$

16. $937 + 226 =$

17. $\frac{4}{5} + 6.4 + 969 =$

18. $2357 + 1.77 + \frac{1}{6} =$

19. $3.53 + \frac{1}{4} + 1826 + 2354 =$

20. $3786 + \frac{5}{6} + 2.396 + 2887 =$
