Converting Linear Equations (D)

Convert slope-intercept to standard forms.

1. Slope-intercept form: $y = \frac{6}{11}x - \frac{12}{11}$

   Standard form: _____

2. Slope-intercept form: $y = -\frac{1}{11}x + \frac{7}{11}$

   Standard form: _____

3. Slope-intercept form: $y = -\frac{1}{6}x - \frac{1}{12}$

   Standard form: _____

4. Slope-intercept form: $y = \frac{8}{11}x - \frac{1}{11}$

   Standard form: _____

5. Slope-intercept form: $y = 4x + 4$

   Standard form: _____

6. Slope-intercept form: $y = -\frac{9}{4}x + \frac{1}{4}$

   Standard form: _____

7. Slope-intercept form: $y = 4x - \frac{4}{3}$

   Standard form: _____

8. Slope-intercept form: $y = 11x + 8$

   Standard form: _____

9. Slope-intercept form: $y = -\frac{2}{5}x + \frac{8}{5}$

   Standard form: _____

10. Slope-intercept form: $y = \frac{11}{10}x - \frac{2}{5}$

    Standard form: _____
