

Converting Linear Equations (D)

Convert standard to slope-intercept forms.

1. Standard form: $9x + 6y = 6$

Slope-intercept form: _____

2. Standard form: $4x + 11y = 12$

Slope-intercept form: _____

3. Standard form: $x + 6y = 11$

Slope-intercept form: _____

4. Standard form: $2x + 7y = -3$

Slope-intercept form: _____

5. Standard form: $11x - 6y = 4$

Slope-intercept form: _____

6. Standard form: $2x + 3y = -10$

Slope-intercept form: _____

7. Standard form: $11x + 12y = 4$

Slope-intercept form: _____

8. Standard form: $6x - 10y = -8$

Slope-intercept form: _____

9. Standard form: $9x + 5y = 10$

Slope-intercept form: _____

10. Standard form: $5x + 2y = -4$

Slope-intercept form: _____
