Converting Linear Equations (G)

Convert standard to slope-intercept forms.

1. Standard form: $x - 2y = 12$

   Slope-intercept form: _____

2. Standard form: $4x - 8y = 3$

   Slope-intercept form: _____

3. Standard form: $7x + y = -1$

   Slope-intercept form: _____

4. Standard form: $5x + 6y = 10$

   Slope-intercept form: _____

5. Standard form: $2x - 6y = -11$

   Slope-intercept form: _____

6. Standard form: $9x + 6y = 7$

   Slope-intercept form: _____

7. Standard form: $8x - 7y = -6$

   Slope-intercept form: _____

8. Standard form: $9x - 2y = 11$

   Slope-intercept form: _____

9. Standard form: $3x - 9y = -12$

   Slope-intercept form: _____

10. Standard form: $12x - 12y = 5$

    Slope-intercept form: _____
