

Converting Linear Equations (H)

Convert standard to slope-intercept forms.

1. Standard form: $12x - 5y = -8$

Slope-intercept form: _____

2. Standard form: $9x - 7y = 6$

Slope-intercept form: _____

3. Standard form: $9x + 11y = -4$

Slope-intercept form: _____

4. Standard form: $10x + 7y = 6$

Slope-intercept form: _____

5. Standard form: $8x + 2y = 7$

Slope-intercept form: _____

6. Standard form: $3x + 6y = 9$

Slope-intercept form: _____

7. Standard form: $5x - 12y = -5$

Slope-intercept form: _____

8. Standard form: $4x + 8y = -1$

Slope-intercept form: _____

9. Standard form: $9x + 12y = -12$

Slope-intercept form: _____

10. Standard form: $10x + 4y = -2$

Slope-intercept form: _____
