

Standard Form of Linear Equations (H)

Write each equation in standard form. Identify the values for A, B and C.

1. $6y = -9 - 8x$

2. $-5y = -7x - 3$

3. $8y - 7 = 9x$

4. $-2y = 5 + 5x$

5. $-2x = y - 8$

6. $-3 - 4x = -7y$

7. $-3y - 9x = -4$

8. $-y = -7 + x$

9. $7y + 2x = 7$

10. $-y + 2x = 5$
