

Standard Form of Linear Equations (J)

Write each equation in standard form. Identify the values for A, B and C.

1. $-9 = 7y - 7x$

2. $7y = -5 - 4x$

3. $-3 + 3y = -2x$

4. $-2 + 7x = -2y$

5. $7 - 7y = -8x$

6. $-7y = -5 - 3x$

7. $3y = -3x + 7$

8. $-2 = -x - 2y$

9. $-1 = 5y + 9x$

10. $5 = 7x - 4y$
