

# Linear Equation from Two Points (C)

Plot a line through the two points then determine the equation for the line.

1.

A(4,-2)

B(-4,6)

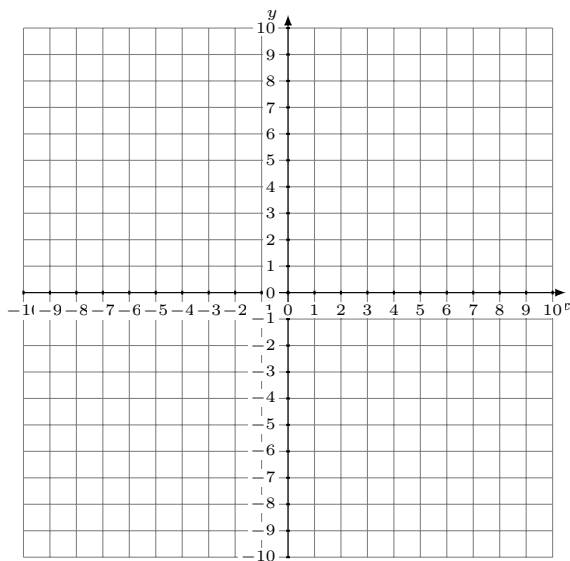

Equation:  $y =$

2.

A(3,-4)

B(-3,8)

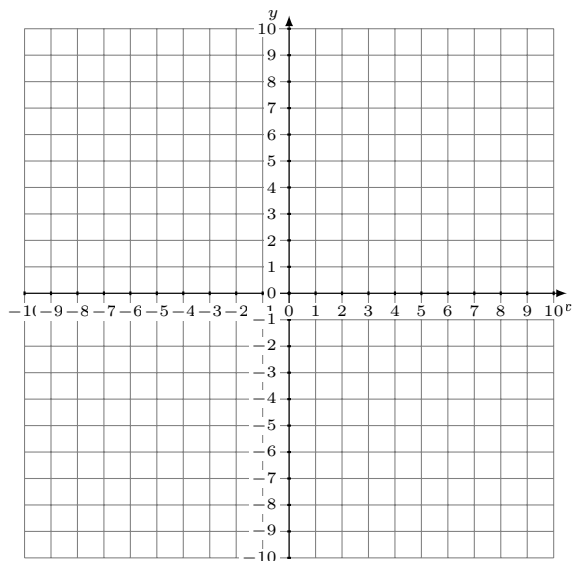

Equation:  $y =$

3.

A(3,8)

B(-3,4)

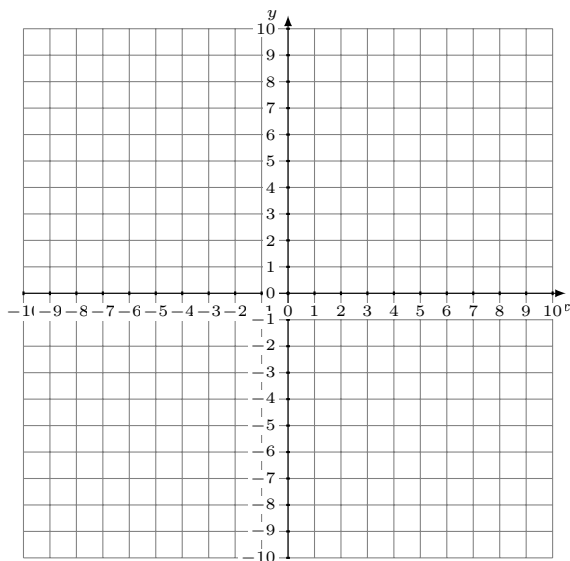

Equation:  $y =$

4.

A(-4,6)

B(-8,7)

Equation:  $y =$
