

Linear Equation from Two Points (E)

Plot a line through the two points then determine the equation for the line.

1.

A(4,-2)

B(6,-3)

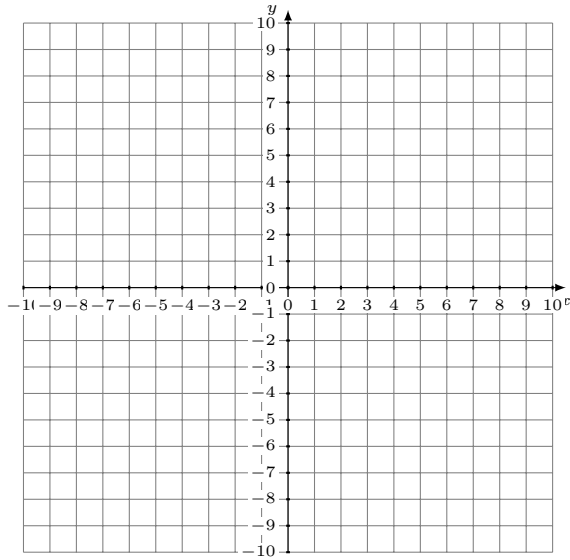

Equation: $y =$

2.

A(-4,3)

B(-2,5)

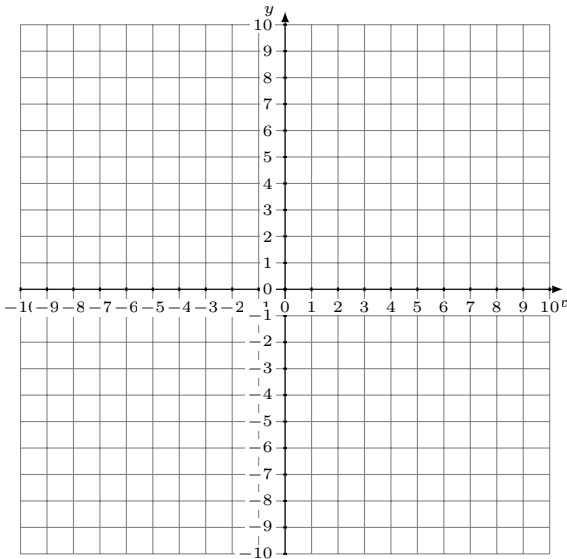

Equation: $y =$

3.

A(-1,-5)

B(-3,-5)

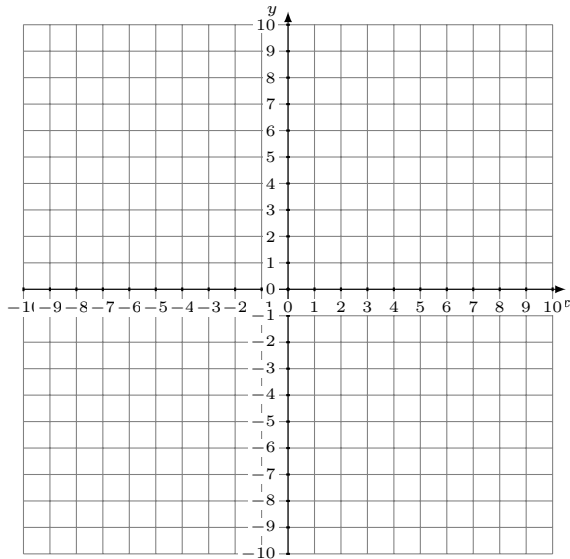

Equation: $y =$

4.

A(-3,0)

B(-9,-8)

Equation: $y =$
