

# Linear Equation from Two Points (J)

Plot a line through the two points then determine the equation for the line.

1.

A(-9,8)

B(6,-2)

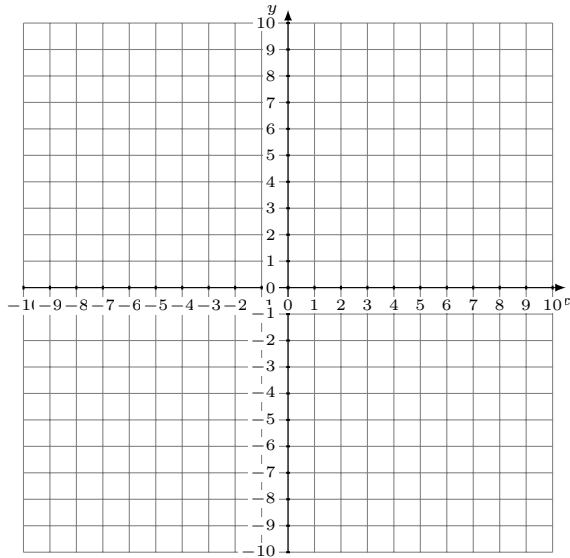

Equation:  $y =$

2.

A(5,-5)

B(-5,-9)

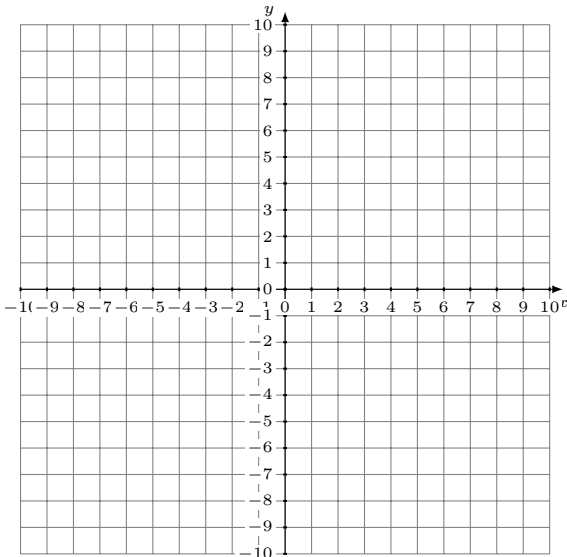

Equation:  $y =$

3.

A(-8,5)

B(-4,0)

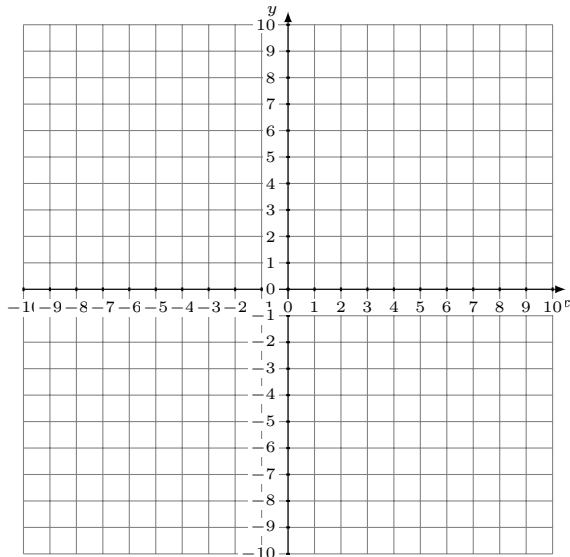

Equation:  $y =$

4.

A(-5,0)

B(0,6)

Equation:  $y =$
