

Adding Two Proper Fractions (I)

Name: _____

Date: _____

Score: _____

Calculate each sum.

1. $\frac{1}{5} + \frac{2}{20} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $\frac{2}{3} + \frac{2}{9} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

3. $\frac{1}{8} + \frac{2}{4} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

4. $\frac{1}{4} + \frac{10}{16} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

5. $\frac{1}{3} + \frac{3}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

6. $\frac{1}{2} + \frac{4}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

7. $\frac{1}{5} + \frac{4}{10} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

8. $\frac{1}{2} + \frac{3}{12} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

9. $\frac{3}{7} + \frac{6}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

10. $\frac{1}{2} + \frac{6}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad}$
