

Adding Two Proper Fractions (J)

Name: _____

Date: _____

Score: _____

Calculate each sum.

1. $\frac{3}{9} + \frac{12}{13} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $\frac{6}{8} + \frac{3}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

3. $\frac{6}{8} + \frac{10}{15} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

4. $\frac{5}{7} + \frac{3}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

5. $\frac{2}{3} + \frac{5}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

6. $\frac{3}{4} + \frac{14}{19} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

7. $\frac{4}{6} + \frac{11}{13} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

8. $\frac{1}{2} + \frac{2}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

9. $\frac{8}{9} + \frac{10}{20} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

10. $\frac{3}{4} + \frac{3}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

Adding Two Proper Fractions (J) Answers

Name: _____

Calculate each sum.

$$1. \quad \frac{3}{9} + \frac{12}{13} = \frac{39}{117} + \frac{108}{117} = \frac{147}{117} = \frac{49}{39} = 1\frac{10}{39}$$

$$2. \quad \frac{6}{8} + \frac{3}{5} = \frac{30}{40} + \frac{24}{40} = \frac{54}{40} = \frac{27}{20} = 1\frac{7}{20}$$

$$3. \quad \frac{6}{8} + \frac{10}{15} = \frac{90}{120} + \frac{80}{120} = \frac{170}{120} = \frac{17}{12} = 1\frac{5}{12}$$

$$4. \quad \frac{5}{7} + \frac{3}{6} = \frac{30}{42} + \frac{21}{42} = \frac{51}{42} = \frac{17}{14} = 1\frac{3}{14}$$

$$5. \quad \frac{2}{3} + \frac{5}{14} = \frac{28}{42} + \frac{15}{42} = \frac{43}{42} = 1\frac{1}{42}$$

$$6. \quad \frac{3}{4} + \frac{14}{19} = \frac{57}{76} + \frac{56}{76} = \frac{113}{76} = 1\frac{37}{76}$$

$$7. \quad \frac{4}{6} + \frac{11}{13} = \frac{52}{78} + \frac{66}{78} = \frac{118}{78} = \frac{59}{39} = 1\frac{20}{39}$$

$$8. \quad \frac{1}{2} + \frac{2}{3} = \frac{3}{6} + \frac{4}{6} = \frac{7}{6} = 1\frac{1}{6}$$

$$9. \quad \frac{8}{9} + \frac{10}{20} = \frac{160}{180} + \frac{90}{180} = \frac{250}{180} = \frac{25}{18} = 1\frac{7}{18}$$

$$10. \quad \frac{3}{4} + \frac{3}{5} = \frac{15}{20} + \frac{12}{20} = \frac{27}{20} = 1\frac{7}{20}$$
