

Adding Proper and Improper Fractions (F)

Name: _____

Date: _____

Score: _____

Calculate each sum.

1. $\frac{6}{7} + \frac{10}{4} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $\frac{1}{4} + \frac{5}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

3. $\frac{1}{6} + \frac{12}{7} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

4. $\frac{8}{9} + \frac{66}{19} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

5. $\frac{1}{3} + \frac{19}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

6. $\frac{3}{5} + \frac{13}{7} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

7. $\frac{6}{8} + \frac{6}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

8. $\frac{1}{3} + \frac{12}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

9. $\frac{1}{2} + \frac{19}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

10. $\frac{3}{8} + \frac{41}{13} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

Adding Proper and Improper Fractions (F) Answers

Name: _____

Date: _____

Calculate each sum.

$$1. \quad \frac{6}{7} + \frac{10}{4} = \frac{24}{28} + \frac{70}{28} = \frac{94}{28} = \frac{47}{14} = 3\frac{5}{14}$$

$$2. \quad \frac{1}{4} + \frac{5}{3} = \frac{3}{12} + \frac{20}{12} = \frac{23}{12} = 1\frac{11}{12}$$

$$3. \quad \frac{1}{6} + \frac{12}{7} = \frac{7}{42} + \frac{72}{42} = \frac{79}{42} = 1\frac{37}{42}$$

$$4. \quad \frac{8}{9} + \frac{66}{19} = \frac{152}{171} + \frac{594}{171} = \frac{746}{171} = 4\frac{62}{171}$$

$$5. \quad \frac{1}{3} + \frac{19}{5} = \frac{5}{15} + \frac{57}{15} = \frac{62}{15} = 4\frac{2}{15}$$

$$6. \quad \frac{3}{5} + \frac{13}{7} = \frac{21}{35} + \frac{65}{35} = \frac{86}{35} = 2\frac{16}{35}$$

$$7. \quad \frac{6}{8} + \frac{6}{5} = \frac{30}{40} + \frac{48}{40} = \frac{78}{40} = \frac{39}{20} = 1\frac{19}{20}$$

$$8. \quad \frac{1}{3} + \frac{12}{5} = \frac{5}{15} + \frac{36}{15} = \frac{41}{15} = 2\frac{11}{15}$$

$$9. \quad \frac{1}{2} + \frac{19}{5} = \frac{5}{10} + \frac{38}{10} = \frac{43}{10} = 4\frac{3}{10}$$

$$10. \quad \frac{3}{8} + \frac{41}{13} = \frac{39}{104} + \frac{328}{104} = \frac{367}{104} = 3\frac{55}{104}$$
