

Multiplying Mixed Fractions (D)

Name: _____

Date: _____

Score: _____ /10

Multiply, simplify and express the product as a mixed fraction.

1. $2\frac{1}{7} \times 4\frac{3}{7} = \underline{\quad} = \underline{\quad}$

2. $2\frac{2}{7} \times 2\frac{1}{6} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

3. $2\frac{5}{6} \times 5\frac{1}{2} = \underline{\quad} = \underline{\quad}$

4. $3\frac{5}{7} \times 4\frac{5}{6} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

5. $4\frac{1}{4} \times 2\frac{1}{2} = \underline{\quad} = \underline{\quad}$

6. $2\frac{3}{4} \times 1\frac{1}{8} = \underline{\quad} = \underline{\quad}$

7. $3\frac{4}{5} \times 2\frac{1}{4} = \underline{\quad} = \underline{\quad}$

8. $3\frac{5}{6} \times 5\frac{3}{4} = \underline{\quad} = \underline{\quad}$

9. $3\frac{3}{7} \times 5\frac{4}{5} = \underline{\quad} = \underline{\quad}$

10. $4\frac{2}{7} \times 5\frac{5}{6} = \underline{\quad} = \underline{\quad} = \underline{\quad}$
