Adding Proper and Improper Fractions (A)

Name: _____ Date: _____ Score: _____

Calculate each sum.

1. $\frac{1}{3} + \frac{13}{6} =$

2. $\frac{4}{6} + \frac{5}{3} =$

3. $\frac{1}{6} + \frac{5}{2} =$

4. $\frac{1}{5} + \frac{13}{10} =$

5. $\frac{1}{3} + \frac{21}{18} =$

6. $\frac{1}{5} + \frac{50}{20} =$

7. $\frac{6}{9} + \frac{27}{18} =$

8. $\frac{2}{3} + \frac{10}{6} =$

9. $\frac{1}{3} + \frac{20}{18} =$

10. $\frac{1}{2} + \frac{18}{8} =$

Adding Proper and Improper Fractions (A) Answers

Name: _____ Date: _____ Score: _____

Calculate each sum.

1. $\frac{1}{3} + \frac{13}{6} = \frac{2}{6} + \frac{13}{6} = \frac{15}{6} = \frac{5}{2} = 2\frac{1}{2}$

2. $\frac{4}{6} + \frac{5}{3} = \frac{4}{6} + \frac{10}{6} = \frac{14}{6} = \frac{7}{3} = 2\frac{1}{3}$

3. $\frac{1}{6} + \frac{5}{2} = \frac{1}{6} + \frac{15}{6} = \frac{16}{6} = \frac{8}{3} = 2\frac{2}{3}$

4. $\frac{1}{5} + \frac{13}{10} = \frac{2}{10} + \frac{13}{10} = \frac{15}{10} = \frac{3}{2} = 1\frac{1}{2}$

5. $\frac{1}{3} + \frac{21}{18} = \frac{6}{18} + \frac{21}{18} = \frac{27}{18} = \frac{3}{2} = 1\frac{1}{2}$

6. $\frac{1}{5} + \frac{50}{20} = \frac{4}{20} + \frac{50}{20} = \frac{54}{20} = \frac{27}{10} = 2\frac{7}{10}$

7. $\frac{6}{9} + \frac{27}{18} = \frac{12}{18} + \frac{27}{18} = \frac{39}{18} = \frac{13}{6} = 2\frac{1}{6}$

8. $\frac{2}{3} + \frac{10}{6} = \frac{4}{6} + \frac{10}{6} = \frac{14}{6} = \frac{7}{3} = 2\frac{1}{3}$

9. $\frac{1}{3} + \frac{20}{18} = \frac{6}{18} + \frac{20}{18} = \frac{26}{18} = \frac{13}{9} = 1\frac{4}{9}$

10. $\frac{1}{2} + \frac{18}{8} = \frac{4}{8} + \frac{18}{8} = \frac{22}{8} = \frac{11}{4} = 2\frac{3}{4}$
