

Adding Proper and Improper Fractions (A)

Name: _____

Date: _____

Score: _____

Calculate each sum.

$$1. \quad \frac{1}{2} + \frac{13}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

Denominator Solve Simplify Convert ↓

$$2. \quad \frac{1}{2} + \frac{14}{8} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$3. \quad \frac{3}{8} + \frac{40}{16} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$4. \quad \frac{1}{7} + \frac{36}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$5. \quad \frac{4}{6} + \frac{19}{12} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$6. \quad \frac{6}{9} + \frac{5}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$7. \quad \frac{1}{5} + \frac{26}{10} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$8. \quad \frac{6}{8} + \frac{18}{16} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$9. \quad \frac{1}{3} + \frac{13}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$10. \quad \frac{1}{2} + \frac{10}{8} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

Adding Proper and Improper Fractions (A) Answers

Name: _____

Score: _____

Calculate each sum.

$$1. \quad \frac{1}{2} + \frac{13}{6} = \frac{3}{6} + \frac{13}{6} = \frac{16}{6} = \frac{8}{3} = 2\frac{2}{3}$$

$$2. \quad \frac{1}{2} + \frac{14}{8} = \frac{4}{8} + \frac{14}{8} = \frac{18}{8} = \frac{9}{4} = 2\frac{1}{4}$$

$$3. \quad \frac{3}{8} + \frac{40}{16} = \frac{6}{16} + \frac{40}{16} = \frac{46}{16} = \frac{23}{8} = 2\frac{7}{8}$$

$$4. \quad \frac{1}{7} + \frac{36}{14} = \frac{2}{14} + \frac{36}{14} = \frac{38}{14} = \frac{19}{7} = 2\frac{5}{7}$$

$$5. \quad \frac{4}{6} + \frac{19}{12} = \frac{8}{12} + \frac{19}{12} = \frac{27}{12} = \frac{9}{4} = 2\frac{1}{4}$$

$$6. \quad \frac{6}{9} + \frac{5}{3} = \frac{6}{9} + \frac{15}{9} = \frac{21}{9} = \frac{7}{3} = 2\frac{1}{3}$$

$$7. \quad \frac{1}{5} + \frac{26}{10} = \frac{2}{10} + \frac{26}{10} = \frac{28}{10} = \frac{14}{5} = 2\frac{4}{5}$$

$$8. \quad \frac{6}{8} + \frac{18}{16} = \frac{12}{16} + \frac{18}{16} = \frac{30}{16} = \frac{15}{8} = 1\frac{7}{8}$$

$$9. \quad \frac{1}{3} + \frac{13}{6} = \frac{2}{6} + \frac{13}{6} = \frac{15}{6} = \frac{5}{2} = 2\frac{1}{2}$$

$$10. \quad \frac{1}{2} + \frac{10}{8} = \frac{4}{8} + \frac{10}{8} = \frac{14}{8} = \frac{7}{4} = 1\frac{3}{4}$$
