

# Dividing Fractions (A)

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Score: \_\_\_\_\_

Calculate each quotient.

$$1. \quad \frac{8}{3} \div \frac{7}{4} = \text{---} \times \text{---} = \text{---} = \text{---}$$

Inversion                  Result                  Convert ↓

$$2. \quad \frac{22}{9} \div \frac{23}{8} = \text{---} \times \text{---} = \text{---}$$

$$3. \quad \frac{5}{4} \div \frac{17}{7} = \text{---} \times \text{---} = \text{---}$$

$$4. \quad \frac{13}{9} \div \frac{23}{8} = \text{---} \times \text{---} = \text{---}$$

$$5. \quad \frac{5}{2} \div \frac{16}{9} = \text{---} \times \text{---} = \text{---} = \text{---}$$

$$6. \quad \frac{5}{2} \div \frac{4}{3} = \text{---} \times \text{---} = \text{---} = \text{---}$$

$$7. \quad \frac{3}{2} \div \frac{8}{3} = \text{---} \times \text{---} = \text{---}$$

$$8. \quad \frac{19}{7} \div \frac{11}{4} = \text{---} \times \text{---} = \text{---}$$

$$9. \quad \frac{9}{4} \div \frac{14}{5} = \text{---} \times \text{---} = \text{---}$$

$$10. \quad \frac{20}{9} \div \frac{17}{7} = \text{---} \times \text{---} = \text{---}$$
