

Subtracting Two Proper Fractions (D)

Name: _____

Date: _____

Score: _____

Calculate each difference.

1. $\frac{5}{12} - \frac{1}{6} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $\frac{5}{6} - \frac{2}{18} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

3. $\frac{2}{3} - \frac{2}{9} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

4. $\frac{19}{20} - \frac{2}{5} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

5. $\frac{10}{12} - \frac{4}{6} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

6. $\frac{8}{9} - \frac{12}{18} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

7. $\frac{5}{6} - \frac{2}{3} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

8. $\frac{2}{3} - \frac{3}{9} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

9. $\frac{15}{18} - \frac{5}{9} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

10. $\frac{12}{16} - \frac{4}{8} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$
