

## Subtracting Proper and Improper Fractions (I)

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Score: \_\_\_\_\_

Calculate each difference.

1.  $\frac{9}{7} - \frac{2}{6} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

2.  $\frac{22}{15} - \frac{1}{2} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

3.  $\frac{5}{4} - \frac{2}{3} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

4.  $\frac{21}{13} - \frac{2}{3} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

5.  $\frac{9}{7} - \frac{6}{9} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

6.  $\frac{12}{11} - \frac{3}{4} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

7.  $\frac{16}{13} - \frac{7}{8} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

8.  $\frac{32}{19} - \frac{6}{7} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

9.  $\frac{15}{9} - \frac{4}{5} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

10.  $\frac{23}{18} - \frac{5}{7} = \underline{\quad} - \underline{\quad} = \underline{\quad}$
