

Subtracting Fractions (H)

Find the value of each expression in lowest terms.

1. $\frac{3}{4} - \frac{3}{7}$

5. $\frac{12}{5} - \frac{21}{13}$

9. $\frac{10}{3} - \frac{35}{16}$

2. $\frac{1}{2} - \frac{2}{9}$

6. $\frac{22}{7} - \frac{3}{5}$

10. $\frac{29}{12} - \frac{5}{7}$

3. $\frac{16}{5} - \frac{1}{3}$

7. $\frac{33}{2} - \frac{35}{3}$

11. $\frac{3}{2} - \frac{12}{19}$

4. $\frac{11}{5} - \frac{11}{7}$

8. $\frac{33}{2} - \frac{15}{2}$

12. $\frac{17}{10} - \frac{7}{9}$

Subtracting Fractions (H) Answers

Find the value of each expression in lowest terms.

$$1. \frac{3}{4} - \frac{3}{7} \\ = \frac{9}{28}$$

$$5. \frac{12}{5} - \frac{21}{13} \\ = \frac{51}{65}$$

$$9. \frac{10}{3} - \frac{35}{16} \\ = \frac{55}{48} = 1\frac{7}{48}$$

$$2. \frac{1}{2} - \frac{2}{9} \\ = \frac{5}{18}$$

$$6. \frac{22}{7} - \frac{3}{5} \\ = \frac{89}{35} = 2\frac{19}{35}$$

$$10. \frac{29}{12} - \frac{5}{7} \\ = \frac{143}{84} = 1\frac{59}{84}$$

$$3. \frac{16}{5} - \frac{1}{3} \\ = \frac{43}{15} = 2\frac{13}{15}$$

$$7. \frac{33}{2} - \frac{35}{3} \\ = \frac{29}{6} = 4\frac{5}{6}$$

$$11. \frac{3}{2} - \frac{12}{19} \\ = \frac{33}{38}$$

$$4. \frac{11}{5} - \frac{11}{7} \\ = \frac{22}{35}$$

$$8. \frac{33}{2} - \frac{15}{2} \\ = 9$$

$$12. \frac{17}{10} - \frac{7}{9} \\ = \frac{83}{90}$$
