Adding Negative Mixed Fractions (B)

Name:_____   Date:_____   Score:_____

Calculate each sum.

1. $\left(-4\frac{1}{4}\right) + \frac{2}{3}$ $= \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $\left(-1\frac{1}{5}\right) + \frac{1}{2}$ $= \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

3. $\left(-4\frac{1}{3}\right) + \left(-3\frac{1}{2}\right)$ $= \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

4. $\left(-2\frac{1}{5}\right) + \frac{3}{4}$ $= \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

5. $\left(-5\frac{1}{4}\right) + \left(-3\frac{2}{3}\right)$ $= \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

6. $\left(-2\frac{4}{5}\right) + \left(-5\frac{2}{3}\right)$ $= \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

7. $\left(-3\frac{1}{2}\right) + \left(-4\frac{1}{3}\right)$ $= \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

8. $\left(-4\frac{2}{3}\right) + 5\frac{2}{5}$ $= \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

9. $\left(-1\frac{3}{4}\right) + 3\frac{1}{5}$ $= \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

10. $\left(-3\frac{2}{3}\right) + 4\frac{1}{4}$ $= \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad}$
