

Adding Negative Fractions (B)

Name: _____

Date: _____

Score: _____

Calculate each sum.

1. $\left(-\frac{2}{6}\right) + \frac{4}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $\left(-\frac{1}{4}\right) + \frac{2}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

3. $\left(-\frac{1}{3}\right) + \left(-\frac{3}{5}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad}$

4. $\left(-\frac{2}{5}\right) + \frac{1}{2} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

5. $\left(-\frac{2}{6}\right) + \left(-\frac{1}{5}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

6. $\left(-\frac{1}{5}\right) + \frac{1}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

7. $\left(-\frac{1}{3}\right) + \frac{1}{2} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

8. $\left(-\frac{2}{3}\right) + \frac{1}{2} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

9. $\left(-\frac{1}{2}\right) + \frac{1}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

10. $\left(-\frac{1}{2}\right) + \frac{2}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad}$
