

Adding Negative Mixed Fractions (F)

Name: _____

Date: _____

Score: _____

Calculate each sum.

1.
$$\left(-5\frac{1}{5}\right) + \frac{1}{2} = \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

2.
$$\left(-1\frac{5}{6}\right) + 2\frac{7}{11} = \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

3.
$$\left(-2\frac{3}{5}\right) + 1\frac{1}{2} = \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

4.
$$\left(-5\frac{7}{8}\right) + 5\frac{2}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

5.
$$\left(-2\frac{5}{12}\right) + 5\frac{2}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

6.
$$\left(-2\frac{1}{3}\right) + 1\frac{1}{11} = \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

7.
$$\left(-3\frac{1}{11}\right) + \frac{1}{4} = \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

8.
$$\left(-1\frac{1}{4}\right) + 1\frac{10}{11} = \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

9.
$$\left(-4\frac{7}{10}\right) + 2\frac{9}{11} = \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

10.
$$\left(-5\frac{1}{5}\right) + 5\frac{7}{8} = \underline{\quad} + \underline{\quad} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$
