

Converting Ounces and Pounds (F)

Convert the mass units in the problems below.

$$\underline{\quad} \text{ tons} = 38,500 \text{ pounds}$$

$$3 \frac{3}{4} \text{ tons} = \underline{\quad} \text{ pounds}$$

$$\underline{\quad} \text{ tons} = 11,000 \text{ pounds}$$

$$\underline{\quad} \text{ tons} = 5,000 \text{ pounds}$$

$$\underline{\quad} \text{ tons} = 35,250 \text{ pounds}$$

$$16 \frac{1}{8} \text{ tons} = \underline{\quad} \text{ pounds}$$

$$\underline{\quad} \text{ tons} = 6,500 \text{ pounds}$$

$$3 \frac{3}{8} \text{ tons} = \underline{\quad} \text{ pounds}$$

$$\underline{\quad} \text{ tons} = 39,750 \text{ pounds}$$

$$\underline{\quad} \text{ tons} = 6,000 \text{ pounds}$$

$$\underline{\quad} \text{ tons} = 30,000 \text{ pounds}$$

$$\underline{\quad} \text{ tons} = 34,000 \text{ pounds}$$

$$\underline{\quad} \text{ tons} = 9,500 \text{ pounds}$$

$$17 \frac{3}{4} \text{ tons} = \underline{\quad} \text{ pounds}$$

$$\underline{\quad} \text{ tons} = 3,250 \text{ pounds}$$

$$\underline{\quad} \text{ tons} = 22,000 \text{ pounds}$$

$$\underline{\quad} \text{ tons} = 14,500 \text{ pounds}$$

$$\underline{\quad} \text{ tons} = 34,500 \text{ pounds}$$

$$\underline{\quad} \text{ tons} = 23,750 \text{ pounds}$$

$$17 \frac{3}{8} \text{ tons} = \underline{\quad} \text{ pounds}$$
