

Dividing Money (C)

Calculate each quotient.

1. $34 \overline{) \$2543.20}$

2. $72 \overline{) \$4406.40}$

3. $18 \overline{) \$745.20}$

4. $18 \overline{) \$1593.00}$

5. $90 \overline{) \$5715.00}$

6. $10 \overline{) \$805.00}$

7. $34 \overline{) \$3165.40}$

8. $20 \overline{) \$588.00}$

9. $23 \overline{) \$1918.20}$

10. If 64 identical toy robots cost \$2214.40, how much did each toy robot cost?
