

## Dividing Money (B)

Calculate each quotient.

1.  $10 \overline{) €405.00}$

2.  $21 \overline{) €1386.00}$

3.  $43 \overline{) €2988.50}$

4.  $66 \overline{) €1254.00}$

5.  $18 \overline{) €1413.00}$

6.  $45 \overline{) €4410.00}$

7.  $85 \overline{) €7735.00}$

8.  $34 \overline{) €663.00}$

9.  $34 \overline{) €663.00}$

10. If 58 identical backpacks cost €2378.00, how much did each backpack cost?
