

## Dividing Money (F)

Calculate each quotient.

1.  $37 \overline{) \pounds 1517.00}$

2.  $32 \overline{) \pounds 1824.00}$

3.  $59 \overline{) \pounds 2861.50}$

4.  $14 \overline{) \pounds 693.00}$

5.  $75 \overline{) \pounds 3712.50}$

6.  $77 \overline{) \pounds 1463.00}$

7.  $37 \overline{) \pounds 1443.00}$

8.  $40 \overline{) \pounds 3900.00}$

9.  $40 \overline{) \pounds 3300.00}$

10. If 92 identical figurines cost  $\pounds 7912.00$ , how much did each figurine cost?
