

# Multiplying by 1 to 12 (J)

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Score: \_\_\_\_\_

Calculate each product.

$9 \times 11 = \square$

$12 \times 8 = \square$

$3 \times 12 = \square$

$6 \times 4 = \square$

$10 \times 9 = \square$

$7 \times 9 = \square$

$1 \times 12 = \square$

$7 \times 3 = \square$

$8 \times 11 = \square$

$9 \times 6 = \square$

$4 \times 10 = \square$

$4 \times 5 = \square$

$12 \times 11 = \square$

$7 \times 4 = \square$

$5 \times 11 = \square$

$7 \times 7 = \square$

$12 \times 12 = \square$

$8 \times 12 = \square$

$7 \times 1 = \square$

$3 \times 2 = \square$

$9 \times 9 = \square$

$9 \times 8 = \square$

$3 \times 1 = \square$

$10 \times 5 = \square$

$10 \times 8 = \square$

$10 \times 12 = \square$

$3 \times 10 = \square$

$4 \times 3 = \square$

$8 \times 9 = \square$

$8 \times 6 = \square$

$9 \times 12 = \square$

$3 \times 4 = \square$

$8 \times 10 = \square$

$7 \times 10 = \square$

$10 \times 4 = \square$

$1 \times 5 = \square$

$11 \times 11 = \square$

$6 \times 2 = \square$

$5 \times 6 = \square$

$9 \times 2 = \square$

$11 \times 8 = \square$

$2 \times 2 = \square$

$1 \times 11 = \square$

$6 \times 7 = \square$

$10 \times 11 = \square$

$1 \times 6 = \square$

$3 \times 11 = \square$

$6 \times 12 = \square$

$11 \times 10 = \square$

$3 \times 6 = \square$

$6 \times 3 = \square$

$8 \times 7 = \square$

$8 \times 2 = \square$

$1 \times 4 = \square$

$10 \times 10 = \square$

$2 \times 6 = \square$

$6 \times 6 = \square$
