

# Multiplying Doubles (I)

Calculate each product.

$11 \times 11 = \underline{\quad}$

$9 \times 9 = \underline{\quad}$

$14 \times 14 = \underline{\quad}$

$2 \times 2 = \underline{\quad}$

$8 \times 8 = \underline{\quad}$

$3 \times 3 = \underline{\quad}$

$4 \times 4 = \underline{\quad}$

$13 \times 13 = \underline{\quad}$

$18 \times 18 = \underline{\quad}$

$20 \times 20 = \underline{\quad}$

$19 \times 19 = \underline{\quad}$

$17 \times 17 = \underline{\quad}$

$5 \times 5 = \underline{\quad}$

$10 \times 10 = \underline{\quad}$

$7 \times 7 = \underline{\quad}$

$16 \times 16 = \underline{\quad}$

$1 \times 1 = \underline{\quad}$

$15 \times 15 = \underline{\quad}$

$6 \times 6 = \underline{\quad}$

$12 \times 12 = \underline{\quad}$

$13 \times 13 = \underline{\quad}$

$14 \times 14 = \underline{\quad}$

$12 \times 12 = \underline{\quad}$

$9 \times 9 = \underline{\quad}$

$3 \times 3 = \underline{\quad}$

$6 \times 6 = \underline{\quad}$

$16 \times 16 = \underline{\quad}$

$2 \times 2 = \underline{\quad}$

$18 \times 18 = \underline{\quad}$

$5 \times 5 = \underline{\quad}$

$11 \times 11 = \underline{\quad}$

$17 \times 17 = \underline{\quad}$

$7 \times 7 = \underline{\quad}$

$19 \times 19 = \underline{\quad}$

$15 \times 15 = \underline{\quad}$

$8 \times 8 = \underline{\quad}$

$1 \times 1 = \underline{\quad}$

$10 \times 10 = \underline{\quad}$

$20 \times 20 = \underline{\quad}$

$4 \times 4 = \underline{\quad}$
