## Converting Decimal to Binary (I)

Write each decimal number as a binary number.

1. $\quad$ Decimal $=2$
Binary =
2. 

Decimal $=11$
Binary =
3. $\quad \begin{aligned} & \text { Decimal }=202 \\ & \text { Binary }=\end{aligned}$
4. $\quad \begin{array}{ll}\text { Decimal }=508 \\ & \text { Binary }=\end{array}$
6. $\quad$ Decimal $=777$

Binary $=$
7. $\quad \begin{array}{ll}\text { Decimal }=645 \\ & \text { Binary }=\end{array}$
8. $\quad$ Decimal $=847$

Binary $=$
9.
Decimal $=5692$
Binary $=$
10. $\quad$ Decimal $=7375$
Binary $=$
