Order of Operations with Decimals (I)

Name: _____

Date: _____

Simplify each expression using the correct order of operations.

$\left((1{,}8)^2 \div (-1{,}8)\right) \times ((-5{,}3) - 0{,}7 + (-7{,}7))$

$\left(1{,}6 \div (-0{,}4)^2 - (-0{,}7) + (-5{,}5)\right) \times (-9{,}5)$

$\left((-1{,}8) + (1{,}8)^2 - (-3{,}8) \times (-9{,}6)\right) \div 0{,}5$

$(((-9{,}2) + 9{,}2) \times 0{,}9)^2 \div 1{,}1 - (-0{,}3)$

$(8{,}5)^2 - 4{,}9 \times ((-6{,}3) \div (-2{,}1) + 0{,}5)$

$4{,}6 + (4{,}5)^2 \div (5{,}3 - 8{,}3) \times (-4{,}6)$
