

Interpreting Circle Graphs (B)

Answer the questions about the circle graph.

Land Area of Continents

As a percentage of the total land area of the Earth.

Source of data: <http://en.wikipedia.org/wiki/Continents>

What are the largest and smallest continents?

What percentage of the world's land area is made up of the Americas?

What is larger: Africa or Australia, Europe and Antarctica put together?

If the land area of Africa is about 30 million square kilometers, what is the approximate land area of the Earth?

Is the size of the continent related to the number of people who live on that continent? Explain your answer.
