

# Interpreting Circle Graphs (C)

Answer the questions about the circle graph.

## Abundance of Elements in Earth's Crust

Source of data: <http://hyperphysics.phy-astr.gsu.edu/hbase/tables/elabund.html>

What element is the most abundant in the Earth's Crust? second most?

If you had 1000 lbs of the Earth's Crust, about how many pounds of iron would you have?

Is there more potassium or sodium in the Earth's Crust?

Most of the elements in the graph make up the rock in Earth's Crust. For example, 60.6% of the Earth's Crust is Quartz ( $\text{SiO}_2$ ) made up of Silicon and Oxygen. What other rock can you find in the Earth's Crust?
