

Spinner Probabilities (B)

Name: _____

Date: _____

Calculate the probability of your spinner landing on each situation.

1. What is the probability of the spinner landing on **an L** in a single spin?
2. What is the probability of the spinner landing on **a G** in a single spin?
3. What is the probability of the spinner landing on **a snail** in a single spin?
4. What is the probability of the spinner landing on **a bear** in a single spin?
5. What is the probability of the spinner landing on **a C OR a squirrel** in a single spin?
6. What is the probability of the spinner landing on **a bear OR an L** in a single spin?
7. What is the probability of the spinner **NOT** landing on **a snail AND an L** in a single spin?

Spinner Probabilities (B) Answers

Name: _____

Date: _____

Calculate the probability of your spinner landing on each situation.

1. What is the probability of the spinner landing on **an L** in a single spin? $\frac{3}{4} = 0.75 = 75\%$
2. What is the probability of the spinner landing on a **G** in a single spin? $\frac{1}{4} = 0.25 = 25\%$
3. What is the probability of the spinner landing on a **snail** in a single spin? $\frac{2}{4} = \frac{1}{2} = 0.5 = 50\%$
4. What is the probability of the spinner landing on a **bear** in a single spin? $\frac{2}{4} = \frac{1}{2} = 0.5 = 50\%$
5. What is the probability of the spinner landing on a **C OR a squirrel** in a single spin? $\frac{0}{4} = 0 = 0\%$
6. What is the probability of the spinner landing on a **bear OR an L** in a single spin? $\frac{4}{4} = 1 = 100\%$
7. What is the probability of the spinner **NOT** landing on a **snail AND an L** in a single spin? $\frac{2}{4} = \frac{1}{2} = 0.5 = 50\%$
