Converting Linear Equations (A)

Convert standard to slope-intercept forms.

1. Standard form: 10x - 7y = -8

Slope-intercept form:

2. Standard form: 8x + y = 9

Slope-intercept form:

3. Standard form: x + 6y = -2

Slope-intercept form:

4. Standard form: 4x + 3y = 9

Slope-intercept form:

5. Standard form: 3x + 12y = -8

Slope-intercept form:

6. Standard form: x + 2y = -8

Slope-intercept form:

7. Standard form: 11x - 8y = 3

Slope-intercept form:

8. Standard form: 4x + 5y = 4

Slope-intercept form:

9. Standard form: 10x - 12y = -4

Slope-intercept form: _____

10. Standard form: 3x - y = 9

Slope-intercept form: _____
